

As the name implies, the Basic+ Pit Gauge is an introductory model in our Pit Gauge Product Series. One of the least popular Dial Indicator Pit Depth Gauges, the Basic+ Pit Gauge, like all of our standard models, is supplied as a Kit (illustrated to the left). These Kits consist of; Dial Indicator (Metric or Imperial) or a Digital Indicator (w#1 Contact Point), Basic+ Blade, Wooden Storage Case, Allan Key (for adjustment), Spare #2 Contact Point, Operator Instructions, and the Calibration Certificate. Any of the models of Basic+ Pit Gauge, like all of our Dial Indicator Pit Gauges, is available as a Metric, Imperial, or Digital model. The Basic+ sets itself apart, from our Basic Pit Gauge in

that it is available in Magnetic versions, with all 3 models of Indicators, with each of the 6 variants illustrated below;

Any of the models of Basic+ Pit Gauge, will provide the inspector with a great deal of accuracy. The Basic and Basic+ models are offered to inspectors who don't understand the importance and versatility of our Reaching Models. The Basic+ can only be used on a straight flat surfaces, such as plate, Pipe or structural section, however they can not be used adjacent to welds, risers, reinforcing pad, etc., as the Indicator is positioned 1³/₄" (44mm) from the edge of the Blade.

The Basic+ Pit Gauge offers a Centre Mount, 3¹/₂" (90mm) Blade, were the Digital Gauge has a Diameter of 55mm (2.2"), while the Metric or Imperial Models are 1¹/₂" (38mm) in diameter. The range of the indicators is as follows;

- Metric - 14mm, in 0.01mm Graduations.
 - Imperial - 0.550", in 0.001" Graduations.
 - Digital - 14mm, in 0.01mm or 0.550", in 0.001" Graduations.
- * All Indicators have an accuracy of 0.005mm and/or 0.0005"
